

MAE106 2009
Final Project Competition Scoring Rules

The competition will last one minute.

We have added a “goal” area in front of your canon. Your opponents will get a point each time the ball goes into your team’s goal area.

The winner is the team with the most points after one minute.

If the point score is tied after one minute, then the winner will be the team who does not have the ball on their side when time expires.

There will be 9 lab champions. For the final competition, we will select two of the lab champions to battle first, in order to form a final field of 8. We will select the two lowest lab champions based on:

- 1) lowest winning percentage from the lab competitions
if the winning percentages are tied, then the tie breakers will be:
- 2) lowest average point margin in lab competitions
- 3) random draw
